Experience

Ascend AI

Full stack engineer

Sept 2023 - present

London, UK

🔗 <https://ascendai.site/>

- Developed a variety of applications including web, mobile, and desktop, with a focus on integrating AI technologies.
- Collaborated with team of developers to design, developed startup level sass product, like <https://clevercore.ai>.
- Developed automated lead generation for Instagram with total 60 thousand successful DM sent and over 1000 active users.
- Developed a web platform for the Netherlands' transportation system that compares prices across multiple carriers in Europe, enhancing customer convenience and cost-effectiveness.

Reinforz AI

Cofounder and COO

June 2022 - Sept 2023

Delware, US

🔗 <https://reinforz.ai/>

- Developed and improved user interface elements, focusing on enhancing user engagement and overall experience, applying advanced principles of UI/UX design.
- Seamlessly integrated backend and frontend systems utilizing RESTful APIs, adhering to the industry-standard MVC architecture to promote efficient data handling and long-term system maintainability.
- Co-authored the webapp with other developers and helped and guide Interns on their tasks.
- Worked on the landing page with proper SEO and analytics.
- Managed site hosting with Docker and leveraged AWS services like Elastic Beanstalk, S3, and EC2 for deployment, storage, and computing.

Projects

Gamezeus 🌐

Gaming news article website

- Developed a gaming news website using NextJS 13 and React server components, utilizing CSR, SSR, and ISR for enhanced user experience and integrated Strapi CMS for efficient content management.
- Automated the CI/CD pipeline to improve deployment efficiency.

Youtube Summarizer 🌐

Youtube Video summarizer

- Developed a React Native Expo app that summarizes YouTube videos using GPT-3.5 by accepting video links.
- Overcame compatibility issues with the existing YouTube transcription package; forked the repository and replaced the phin with axios for React Native support.
- Published a modified version of the package on npm to extend functionality to the React Native ecosystem.
